This Invaluable NEW TV Servicing Book

99c

... yours for only

with Trial Membership in Electronic Technician's Book Club

May we send you this unique time-saver as part of an unusual offer of a Trial Membership in Electronic Technician's Book Club?

A Massive, Authoritative Compilation

Now you can have, at your fingertips, this carefully-planned, comprehensive handbook which contains the TV service data *most needed* for troubleshooting both monochrome and color receivers.

Selected by the Editorial Staff of "Electronic Technician," this brand-new volume contains just the kind of practical, down-to-earth information you can use in your everyday service work.

This detailed compilation of *practical* help is the answer to the need for an organized gathering of proven troubles and cures that will help you locate and correct the most elusive TV circuit faults . . . in home or at the service bench.

While no one book is a cure-all for TV troubles, *Servicing TV Receiver Circuits* comes about as close as you can get. Every chapter follows the time-proven methods of experienced troubleshooters — analyzing circuit performance and applying logical and efficient test procedures. Numerous example troubles are

cited to help you solve "tough-dog" problems.

A full 10 chapters are devoted to color, and include the practical background theory needed to troubleshoot and repair today's complex color TV receivers, with step-by-step color TV servicing techniques, complete with test procedures, waveform photos, and trouble-correction techniques. When you're faced with a "tough-dog" set, this book will prove invaluable to you in servicing TV receivers.

Assembled for the first time in book form, *Servicing TV Receiver Circuits* is the one volume that will help you solve your daily servicing problems . . . will save you hours of time and effort. This handsome, hardbound book is indicative of the many other fine offerings made to Members . . . important books to read and keep . . . volumes with your specialized interests in mind.

AN EXTRAORDINARY OFFER...

introducing the benefits of Membership in Electronic Technician's Book Club

for a limited time only you can obtain this invaluable **NEW**
SERVICING TV RECEIVER CIRCUITS

for only **99¢** . . . with Trial Membership in the Club

How You Profit From Club Membership

This is just a sample of the help and generous savings the Club offers you. For here is a Club devoted exclusively to seeking out only those titles of interest to you as an electronic technician (No hobby or "fringe" books are offered.) Membership in the Club offers you several advantages:

- 1. Charter Bonus: Servicing TV Receiver Circuits** carries a retail price of \$6.95. But it can be yours for only 99¢ with your Trial Membership.
- 2. Continuous Savings:** The Club guarantees to save you 15% to 75% on the books you need.
- 3. Editorial Advisory Services:** The Club's Editorial Advisory Board selects only the important books of direct interest to you.
- 4. Wide Selection:** Members are annually offered over 50 of the authoritative books on all phases of electronic servicing. The Club makes it a point to offer new books, along with standard classics . . . lists books from *all* publishers — not just one or two.
- 5. Prevents You From Missing New Books:** The Club's FREE monthly *News* gives you advance notice of important new books . . . books vital to your continued professional advancement.

Literally scores of easy-to-use schematic diagrams and illustrations are contained in **Servicing TV Receiver Circuits**. (Example shown greatly reduced in size.)

This extraordinary offer is intended to prove to you, through your own experience, that these very real advantages can be yours . . . that it is possible to keep up with the professional literature published in your specific area of interest . . . and to save substantially while so doing.

How the Club Works

Forthcoming selections are described in the FREE monthly *Club News*. Thus, you are among the first to know about, and to own if you desire, significant

books. You choose only the main or alternate selection you want (or advise if you wish no book at all) by means of a handy form and return envelope enclosed with the *News*. As part of your Trial Membership, you need purchase as few as four books during the coming 12 months. You would probably buy at least this many anyway . . . without the substantial savings offered through Club Membership.

Limited Time Offer!

Here, then, is an interesting opportunity to enroll on a trial basis . . . to prove to yourself, in a short time, the advantages of belonging to the only Book Club devoted *exclusively* to electronic servicing. We urge you, if this unique offer is appealing, to act promptly, for we've reserved only a limited number of copies of **Servicing TV Receiver Circuits** for new Members.

To start your Membership on these attractive terms, simply fill out and mail the postage-paid Airmail card today. You will receive **Servicing TV Receiver Circuits** for 10-day inspection. **SEND NO MONEY!** If you are not delighted with the Handbook, return it within 10 days and your Trial Membership will be cancelled without cost or obligation. Electronic Technician's Book Club, Drawer D, Thurmont, Md. 21788.

ELECTRONICIAN

WORLD CIRCULATION

FREE

120 pages of new schematics as an introductory gift with your trial subscription to

ELECTRONIC TECHNICIAN

Completely revised edition. 100 of the past year's most used TV schematics including the most popular B/W and color TV sets. Covers 150 different manufacturer chassis numbers. Accurate, authentic manufacturer reproductions complete with essential service data. King-sized 11" x 15" pages. Handsome, sturdy binding.

NEW FOR '67

JANUARY 1967

Replacing Color TV Flybacks | Marine Electronics Business | Selecting 2-Way Antennas

Subscribe now and get this valuable introductory gift absolutely free!

Dear Service-Dealer and Technician:

Here's an opportunity for you to get, in one convenient book, 100 of the latest, most used, most popular TV schematics.

It's the new 108 **TEKFAX** -- the latest in the famous series of schematic books compiled by the editors of **ELECTRONIC TECHNICIAN**.

This king-sized book is available to you absolutely free as an introductory gift for trying **ELECTRONIC TECHNICIAN**, the world's leading magazine for TV-radio, Hi Fi and two-way communications service-dealers and technicians.

Certainly you've heard plenty of talk about previous editions of these TV-Radio schematics. Again and again, technicians have told us that these big volumes are literally "Worth their weight in gold."

You get schematics and service data on 150 different chassis and model numbers. Along with the big 11 x 15 schematics, you get a wealth of valuable service data, including operating voltages, alignment data, waveforms, tube location guides, and much, much more.

You can imagine what these schematics -- 120 pages of them -- would cost if you tried to buy them separately or in sets. Yet, the entire book is yours free for trying **ELECTRONIC TECHNICIAN** for the next 24 months.

And once you've tried **ELECTRONIC TECHNICIAN**, we're confident you will agree that it is a bargain at any price.

For example. . .

Only in **ELECTRONIC TECHNICIAN** do you get, with each issue, a complete set of **TEKFAX** -- sixteen pages of the latest schematics of the newest TV sets to hit the market. These big 11 x 15 schematics come complete with parts lists, voltage readings, waveforms, tube and parts layout, tuner information, adjustment location, plus special manufacturer's servicing data.

Imagine how much you would spend if you purchased these schematics from the manufacturer or if you subscribed to an expensive schematic publishing service. I think you'll agree with many other technicians who say such a service could cost from \$300 to \$400 a year.

But as an **ELECTRONIC TECHNICIAN** subscriber these schematics come to you every month entirely free with a two years' subscription.

What's more you can be sure that you get schematics for all of the important sets on the market -- not the useless dust collectors. Each month

ET's editors carefully screen each schematic available and then give you the ones you need most in an easy to read, easy to use format.

But that's just one part of the great package you'll get every month.

Each month ELECTRONIC TECHNICIAN will bring you a wealth of "shirt-sleeve" troubleshooting and repair articles. Firsthand, from manufacturers technical specialists, from technical experts in the field, from other service technicians and from specialists in "ET's" TEKLAB, you'll learn how to solve virtually every service problem you'll ever have. You'll learn how to do these jobs quickly, expertly and at a profit.

Look at just a few samples from recent issues. . .

Blanking and Gating in Color Sets
Color Servicing Tips and Countermeasures
Review of 1967 TV Sets
Solving Color TV High Voltage Problems
Aligning and Troubleshooting FM/Stereo Equipment
Making Money with Garage Door Operators
Semiconductors from A to Z
Servicing Solid-State Portable Phonographs
The ABCs of Automatic Record Changers
Rapid-Fire Location of Stereo Amplifier Faults
Ten Frequent Color Troubles
Selecting the Best Antenna for a Given Job
Troubleshooting Solid-State Portable Phonographs
Servicing Solid-State Portable TVs

You'll also get articles on radio communications equipment -- regular and CB equipment; articles on servicing and repairing auto radios and tape players; articles on photoelectric controls, medical electronic instruments, CCTV.

Just as important, ET will keep you constantly posted on the latest test instruments, how to get the most out of them, what to buy, how to repair them...

Color Bar/Dot Generators
Doing More with your VTVM
You and your Oscilloscope

ELECTRONIC TECHNICIAN is the magazine for professionals, and unlike do-it-yourself, hobby-type and other newsstand magazines, ET brings you professional service on how to run your business at a bigger profit. These articles come right from the "horse's mouth" -- direct from professional service-dealers throughout the country:

"Call-Backs" can Break you!
Cash Register Plays "Jingle Bells" Year-round
Growing in a Competitive Market
Homer Davidson Pushes Color TV
Life Insurance for the Shop Owner
Marching in the "Peacock Parade"
Open Hand Policy Doubles Income
Service Bedrocks Sales
Service-Dealer Mines Both Ends of Color TV Rainbow

You can also look forward to a score of regular departments in every issue of ELECTRONIC TECHNICIAN -- the famous "Colorfax" columns; "Sync on Business"; Then there are Catalog and Bulletin Reports; New Book Reviews; Technical Digest; New Products.

We could go on and on -- telling you how helpful you'll find ET; how it is America's most valuable source of servicing and troubleshooting know-how; how more men like yourself subscribe to it than to any other magazine like it in the world.

ET is a professional magazine for professionals only! And one idea alone from just one issue could make you a profit much larger than the small subscription price.

ELECTRONIC TECHNICIAN comes to you for only \$8 for two full years (24 issues) -- or three years for only \$10. I think you'll agree that this is a mighty good investment -- only pennies a week give you TEKFAK schematic service PLUS an endless list of technical articles and features. (As you know, ET is not sold on the newsstands.)

And now that you can get the famous TEXFAX book FREE -- as an introductory bonus -- this offer is without doubt the best buy ever. What's more, we will guarantee this offer.

If the big book of TEXFAX isn't as valuable as we say it is -- or if you aren't 100% satisfied with your first issue of ELECTRONIC TECHNICIAN -- we will refund your subscription with no questions asked.

There's no question about it -- you just can't lose. So what better time than right now to enter your subscription to ELECTRONIC TECHNICIAN, the world's leading electronics publication.

Please remember, though, because of the costs involved in producing the big 108 book, the number of copies available are limited. Requests must be strictly treated on a first-come, first-served basis. (Previous editions of TEKFAK have been a complete sellout!) We urge you to sign the enclosed postage-paid card and drop it in the mail -- right now before you forget. Then you can put ET and the 108 to work for you right away.

Your credit is good. We'd be glad to bill you later if you prefer.

Cordially,

Joe Wolking

for ELECTRONIC TECHNICIAN
